END-USE STATEMENT

Use of Maude outside the USA may be subject to US Government export licensing requirements. The requirements are dependent on the use to be made of Maude. Overseas users must therefore submit with their completed license a statement of the end-use to which they plan to put the software.

If it applies to your use of Maude, we suggest you use the following form of words:

> *Maude will be used to conduct basic and applied research. It is intended that the results of the research will be made generally available, and published should they merit it.*

If your use of Maude will concern something other than research, or if the results will be restricted for proprietary or national security reasons, then please provide explicit details in your end-use statement.

Please write or type your end-use statement below.
